# Bigtop Early Mission Accomplished

---

All major Hadoop distros leverage Bigtop to build its foundation

# Looking at Road Ahead

---

- Data engineers vs distro builders
- Enhance Operations & Deployment
- Reference implementation & tutorials

# Port to OpenPOWER

---

- Porting to POWER has become effortless
  - Advent of OpenJDK for POWER
    - No porting required
    - %100 compatible with Oracle JAVA
  - POWER with Little endian
    - No porting, just recompile native (C/C++) libraries
    - Examples, Canonical port and tested 40,000 packages in 4 months
    - Ported 22 out of 24 Apache Big Top stacks to POWER in two week.

# Build for OpenPOWER

---

- Build of Apache projects are not for the faint-hearted.
- Many build dependencies
- Various development tools
- Many Linux distribution to support
